

Communications and IT Services

Oceanering[®] provides turnkey networking, video and voice solutions that enable our customers to accomplish complex missions in harsh environments. Through our combination of advanced technology and highly skilled personal, we help customers deploy real-time data and communication systems anywhere they're needed to facilitate the execution of difficult offshore tasks and initiatives.

Solve tough challenges with Oceanering Communications and IT Services. Oceanering draws on more than 50 years of marine and offshore experience to provide solutions for the most difficult environments. We help make sure your data gets to the right people and machines at the right time.

- » Connect offshore assets to global operations centers using satellite, cellular and mesh technologies.
- » Deploy broadband internet on a rig, or backhaul video from vessels, ROVs, platforms and refineries.
- » Achieve real-time data capabilities in the harshest environments.
