

FAIRING INSTALLATION TOOL (FIT)

The Fairing Installation Tool (FIT) is designed to attach prefabricated fairings to production risers. The fairings have a simple pin and box connection that interfaces to the arms on the FIT. The FIT opens the fairing, places it around the riser and closes its arms. It then releases the fairing, acquires another from a deployment frame, and continues the process.

Technical Data / Specifications

Dimensions:

Length:	38 in
Width:	44 in
Height:	93 in

Weight:

In Air:	550 lb
In Saltwater:	75 lb

Materials:

- 6061-T6 Aluminum
- 316 Stainless Steel
- Nickel Aluminum Bronze
- Brass

Coating:

- Hard Anodized

Interface:

- Quad Port Hot Stab
- 1/4 Zero Leak QD

Hydraulics:

- 1,700 psi @ 3 gpm
