

GAUGE PACK STAB

Oceanneering Gauge pack is unique design with Standard 17H dual port stab, isolation valves and Gauges. Gauge pack is used to do the pressure test on systems where the pressure can be isolated at the manifold. This compact design eliminates requirement of extra hardware on ROV.

Technical Data / Specifications

Specifications

Pressures: Up to 10,000 psi

Connection Types: ¼ in JIC

Materials

- Nitronic 50 & 60
- 316 Stainless Steel
- 17-4 Stainless Steel
- Aluminum

ROV Interface

- Compliant & Rigid Handles Available

Custom designs available
