

INTENSIFIER PANEL

Oceaneering offers Hydraulic Pressure Intensifier Panels. The panels easily mount on ROVs to provide high pressure and low flow to tooling that requires it. They are popular accessories for Linear Valve Override Tools (LVOT).

All Oceaneering Intensifier Panels incorporate safety blow off valves and gauges to protect and monitor the hydraulic circuit.

Example Intensifier Panel

Weight	10 lb
Length	14 in
Width	10 in
Height	10 in
Materials	Aluminum / 316 Stainless Steel,
Max input pressure	2,300 psi
Intensifier ratio	7:1
