

# PIPE GRAPPLE TOOL

The Pipe Grapple Tool is designed to accommodate pipes up to 18 inches in diameter. The tool is deployed by downwire and is driven by hydraulic cylinders. The grapple can be equipped with an intuitive software package which gives the topside user real time data on the jaw position. Custom sizes can be built to client specifications.

## Technical Data / Specification

### Performance

Max, Hydraulic Actuation	3,000 psi
Pipe Range	up to 18 in diameter
Maximum Lifting Load	40,000 lb

### Weight

In Air	1,100 lb
--------	----------

### Dimensions

Length	7 ft
Width	4 ft
