

SUBSEA CALIPER TOOL

The Oceaneering Subsea Caliper Tool is an ROV-operable measurement device. The tool is easily configured for wide-ranging measurement applications with accuracy to ± 0.01 inch.

Technical Data / Specifications

Dimensions

Length	44 in
Width	0.6 in
Height	24 in
Measurement Range	0-13 in
Stroke Length	0.8 in

Weight

Air	69 lb
Water	55 lb

Materials

- 6061 Aluminum

Coating

- Hard Anodized

Interface

Power Requirements	24 V DC, 2A
Communications Protocol	RS232
Baud Rate	19,200
Data Bits	8
Parity	None
Stop Bits	1
