

SUBSEA CHAIN CALIPER TOOL

The Oceaneering Subsea Chain Caliper Tool is an ROV deployable measurement device. The tool is capable of measuring both grip and crown chain dimensions. Different size chains can be measured with simple tool reconfiguration.

This tool has been certified by Offshore Classification Canada with an accuracy to ± 0.02 inches.

Technical Data / Specifications

Dimensions:

Length:	46 in
Width:	17 in
Height:	29 in
Measurement Range:	0-8 in
Stroke Length:	8 in

Weight:

In Air:	317 lb
In Saltwater:	257 lb

Materials:

- 6061 Aluminum

Coating:

- Hard Anodized

Interface:

Power Requirements:	24 V DC, 4 A
Communications Protocol:	RS232
Baud Rate:	19,200
Data Bits:	8
Parity:	None
Stop Bits:	1
