

# SUBSEA ROV WINCH

The Subsea ROV Winch has a lightweight and compact design for easy handling. The winch has 28,660 lbs. pull and it can be operated without any need of wires from the surface. The Subsea ROV Winch is an independent tool without any mechanical or hydraulic connections to the ROV.

The winch is parked in a standard API 17D Class 4 interface.

## Technical Data / Specifications

Depth rate	8,200 fsw
Size (W x D x H)	24.9 in x 20.5 in x 43.5 in
Weight in Air	507 lb
Weight in Water	100 lb
Max Torque in	562 ft-lb
Max pull	28,660 lb
Breaking force	42,990 lb
Interface to Torque Tool	API 17D Class 4 Bucket
Interface to structure	API 17D Class 4 Lock to structure Mechanical lock w/ Fail-Safe
