

# TRASH PUMP

The Trash Pump is used for light dredging tasks to clear pipe line crossing, drill cuttings, and partially buried subsea hardware or equipment. The Trash Pump can clear up to 3 inch solids.

## Technical Data / Specifications

### *Hydraulic Motor*

Pressure: 2,000 psi  
Input flow: 7-9 gpm (26-34 lpm)  
operating range  
Connection Type: 1/2 JIC Supply and Return

### *Pump*

Output flow: 450 gpm  
Output: 25-30 psi head pressure

- Urethane / cast iron impeller
- Submersible (no priming required)
- Able to run dry without damage
- Urethane and steel bowl
- Lifting eye and carrying handle
- 3 in or 4 in discharge
