

Taking Responsibility

If you see it, you own it

Whether at work or at the work site, safety is not only about taking precautions, it's also about taking responsibility.

- If you come across an unsafe situation, or even a potentially unsafe situation, don't simply ignore it. Take responsibility for getting it corrected.
- Speak up when you see something that you believe is unsafe, or could lead to an adverse incident.
- If it's unsafe to actually do something on your own, keep others out of the unsafe zone and contact your supervisor and HSE representative.
