

## Nonconformance

**NONCONFORMANCE** is failure to comply with a requirement, standard, or procedure, resulting in a defect. Those requirements might be defined by the customer, a regulatory body, or in the internal procedures of the company.

Nonconformance(s) impact on a business can have the following effects:

- Engineering Redesign
- Rework
- Scrap
- Premium Transportation/Expediting
- Field Modification(s)
- Re-inspection and Testing
- Liquidated Damage Payout
